## LANGUAGE AND LITERATURE

### English Language and Literature

During this year we will complete four or five units of work in Language and Literature. These units will be from the following list:

- Novel – *The Cay*: students will explore the novel genre, focus on relations and communication, and construct opinion paragraphs.
- Shakespeare – *A Midsummer Night’s Dream*: a study of the format of the play, its content and its language. Interdisciplinary assignment creating script and storyboard for stop-motion animated film.
- Literature – *The Abomination*: The students will explore the idea that culture, religion and tradition may make us who we are. Writing a continuation in “cliff-hanger” style and book review.
- Short Story – *The Good Deed* and other short stories: The students will delve into creative writing of their own short stories, in conjunction with studying short stories by Pearl S. Buck which take place in East Asia during the early 20th century.

Each unit of work will require students to plan, use, evaluate and document sources using the appropriate format. Students will carry out text comprehension exercises, interpretation of visual information and produce written pieces in different formats, plan and execute oral presentations and compare and contrast genres and authors.

#### Assessment

Language and Literature will be assessed using four criteria– Analysing, Organising, Producing text and Using Language. For each of these there is a rubric informing students what they need to do in order to achieve each level. Students should make sure they read each rubric carefully so that they understand what is being assessed.. The rubrics will be put onto the learning platform It’s Learning along with the learning objectives for each unit.

#### Criterion A: Analysing – Maximum 8

Assessed through comparing and contrasting genres and texts, analysing the effects of the creator’s choice on an audience and analyzing content, context, language, structure, technique and style of the texts.

#### Criterion B: Organising – Maximum 8

Assessed through producing work that employs organisational structures that serve context and intention, and using referencing and formatting tools to create work that serves the context and intention.

#### Criterion C: Producing Text – Maximum 8

Assessed by making stylistic choices in terms of linguistic, literary and visual devices, and demonstrating awareness of impact on an audience.

#### Criterion D: Using Language – Maximum 8

Assessed by written pieces in different formats, which employ correct grammar, syntax, spelling, punctuation and the use of appropriate non-verbal communication techniques.

## LANGUAGE AND LITERATURE

### Norwegian Language and Literature

The four assessment criteria in Norwegian Language and Literature are:

- A. Analysing.
- B. Organizing.
- C. Producing text.
- D. Using language.

Each criterion has detailed descriptors, and to a maximum of eight levels. Students are engaged in unit studies in at least four units each year. The units are based on conceptual ideas and the studies require student involvement in making inquiry questions related to a global context. The learning process also includes attaining, practicing, and mastering identified approaches to learning skills. The assessment of formative and summative learning records the student's level of competence in the subject.

#### **Unit 1. Written, oral and visual communication**

Example of task: produce a text, apply all three forms of communication and a rationale.

*Criterion C* - make stylistic choices in terms of linguistic, literary and visual devices, demonstrating awareness of impact on an audience

*Criterion A* - identify and comment upon significant aspects of texts and identify similarities and differences in features within and between texts

#### **Unit 2. Media text - language and structure**

Example of task: produce advertisements

*Criterion B* - employ organizational structures that serve the context and intention and use referencing and formatting tools to create a presentation style suitable to the context and intention

#### **Unit 3. Grammar – a language about language**

Example of task: written text

*Criterion D* - use appropriate and varied vocabulary, sentence structure and forms of expression. Use correct grammar, syntax and punctuation. Spell, write and pronounce with accuracy

#### **Unit 4. Analysis of text, context and purpose**

Example of task: an oral presentation of a study film as text

*Criterion A* - Identify and comment upon significant aspect of texts and identify and comment upon the creator's choices. Justify opinions and ideas, using examples, explanations and terminology. Identify similarities and difference in features within and between texts.

*Criterion C* - Produce texts that demonstrate thought and imagination while exploring new perspectives and ideas arising from personal engagement with the creative process. Select relevant details and examples to support ideas.

## Assessment criteria overview

Assessment for language and literature in all years of the programme is criterion-related, based on four equally weighted assessment criteria:

<b>Criterion A</b>	Analysing	<b>Maximum 8</b>
<b>Criterion B</b>	Organizing	<b>Maximum 8</b>
<b>Criterion C</b>	Producing text	<b>Maximum 8</b>
<b>Criterion D</b>	Using language	<b>Maximum 8</b>

Subject groups **must** address **all** strands of **all** four assessment criteria **at least twice** in each year of the MYP.

In the MYP, subject group objectives correspond to assessment criteria. Each criterion has nine possible levels of achievement (0–8), divided into four bands that generally represent limited (1 or 2); adequate (3 or 4); substantial (5 or 6); and excellent (7 or 8) performance. Each band has its own unique descriptor that teachers use to make “best-fit” judgments about students’ progress and achievement.

This guide provides the **required assessment criteria** for years 1, 3 and 5 of MYP language and literature. In response to national or local requirements, schools may add criteria and use additional models of assessment. Schools must use the appropriate assessment criteria as published in this guide to report students’ final achievement in the programme.

Teachers clarify the expectations for each summative assessment task with direct reference to these assessment criteria. Task-specific clarifications should clearly explain what students are expected to know and do. They might be in the form of:

- a task-specific version of the required assessment criteria
- a face-to-face or virtual classroom discussion
- a detailed task sheet or assignment.

## LANGUAGE ACQUISITION

### Norwegian Language Acquisition

The following units will be taught:

- Myself, my family and my friends - all phases
- My daily life - all phases
- Speaking about food- all phases
- My clothes - all phases
- Syntax and grammar - all phases

This is a language acquisition course for emergent, capable and proficient communicators. It is taught within the MYP framework for language acquisition combined with the curriculum for the subject “Basic Norwegian for language minorities” from the Norwegian national curriculum and is structured in 6 phases: 1-2 emergent communicators, 3-4 capable communicators, 5-6 proficient communicators. The individual student’s phase is determined according to their language proficiency (oral, visual, and written). For students who are in Norway on a long time basis, the aim is that they should eventually become proficient enough to transfer to Language and Literature.

#### Organization

Language Acquisition students will sometimes take part in Language and Literature classes when this is seen to be pedagogically beneficial for the individual student’s language acquisition. This is an on-going evaluation and the decision is made by the subject teachers. These students are still considered as Language Acquisition students and will be assessed using Language Acquisition criteria.

A transition from Norwegian Language Acquisition to Language and Literature happens after an evaluation by the subject teacher and in dialogue with the student and parents.

#### Assessment

##### **Criterion A: Comprehending spoken and visual text** – Maximum 8

A typical task would be watching a film, a clip from TV or a spoken or visual advertisement and the students answer questions either spoken or written. Phases 1-2 can answer questions in English.

##### **Criterion B: Comprehending written and visual text.** – Maximum 8

The students read a written and visual text and answer questions.

##### **Criterion C: Communicating in response to spoken, written and visual text** – Maximum 8

The students can here write an essay or an oral task where they express ideas and feelings, and communicate information in familiar and unfamiliar situations.

##### **Criterion D: Using language in a spoken and written form** – Maximum 8

Here the student will show the use of a range of vocabulary, grammatical structures and convention, pronunciation in oral expression and organization of information and ideas, and use of basic cohesive devices. This will be assessed in an interactive oral task or a written task.

## LANGUAGE ACQUISITION

### French Language Acquisition

We will use the books Expo 1 chapter 1, 2, 3 and 4, and the following units will be taught:

- Myself and my family and my friends - all phases
- My home and my town - all phases
- A day in my life - all phases
- Amusement and hobby - all phases

We work on syntax and grammar ongoing - all phases

In the context of the language acquisition subject group framework, to be multiliterate is defined as being able to understand and use print-based and digital spoken, written and visual text. This is a language acquisition course for emergent, capable and proficient communicators. It is taught within the MYP framework for language acquisition and the objectives will be to enable students' understanding of the new language through learning language, learning through language, learning about language.

Teaching and learning in the language acquisition subject group is organized in six phases. The phases do not correspond to particular age groups or MYP years and the teacher will need to decide the most suitable phase in which to place individual students or a group of students. The phases are organized as follows: 1 - 2 emergent communicators, 3 - 4 capable communicators, 5 - 6 proficient communicators.

#### Organization

Ideally, language acquisition students should be taught in groups of students all in similar phases. Student numbers and lesson scheduling does not always allow this. Usually, we have a range of students, from beginners to proficient users, in the same group.

#### Assessment:

French is assessed using four criteria. The work will be assessed formatively and summatively.

#### Criterion A: Comprehending spoken and visual text - Maximum 8

A typical task would be watching a film, a clip from TV or a spoken or visual advertisement and the students answer questions either spoken or written. Phases 1-2 can answer questions in English.

#### Criterion B: Comprehending written and visual text - Maximum 8

The students read a written and visual text and answer questions.

#### Criterion C: Communicating in response to spoken, written and visual text - Maximum 8

Students may write an essay or an oral task where they express ideas and feelings, and communicate information in familiar and unfamiliar situations.

#### Criterion D: Using language in spoken and written form - Maximum 8

Here the student will show the use of a range of vocabulary, grammatical structures and convention, pronunciation in oral expression and organization of information and ideas, and use of basic cohesive devices. This will be assessed in an interactive oral task or a written task.

## INDIVIDUALS AND SOCIETIES

### Integrated Humanities

During this year we will complete five or six units of work in Integrated Humanities from the following list:

- Stranger than fiction: What is History? What is Geography? – *Analysis of sources, learning how to make bibliographies, learning how to carry out research, bias, chronology, physical geography, human geography and environmental geography.*
- Weather and Climate – *How to observe and record weather, microclimates, aspects, forecasting weather.*
- Hazards and Disasters – *Development of strategies for living in hazardous environments, human response, scientific and technical innovation.*
- The Water Cycle – *Risks and prevention. Comparison of two countries and human response.*
- Our Earth – *Personal and social perspectives on the process and effects of globalization.*
- Our Earth extensions - *Castles and their developments. An investigation into the causes and consequences of scientific and technical innovations (weaponry).*
- One for all and all for one – *An investigation into personal expression, cause and consequence and systems. Is it possible, on a local, national and global scale to be individual and still be a team player?*

Each unit of work will require students to plan, use, evaluate and document sources using the appropriate format and identify bias, present information in a range of different formats eg. maps, timelines, graphs and sketches. Students will also be required to be active in note taking and discussions. Each unit will conclude with a reflection on the process and what has been achieved.

#### Assessment

Individuals and Societies will be assessed using four criteria – Knowing and Understanding, Investigating, Communicating and Thinking Critically. For each of these there is a rubric informing students what they need to do in order to achieve a certain level. Students should make sure they read each rubric carefully so that they understand what they are assessed on. The rubrics will be made available on the learning platform It's Learning along with the learning objectives for each unit.

#### Criterion A: Knowing and Understanding – Maximum 8

Assessed through written pieces of work in the form of essays, oral presentations, reports, posters, brochures, newspaper articles, action plans, budgets, diagrams, time-lines and maps.

#### Criterion B: Investigating – Maximum 8

Assessed through completing work plans, developing guiding/research questions and explaining the choice, collecting and recording relevant information consistent with the research question, and reflecting on the process and results of the investigation.

#### Criterion C: Communicating – Maximum 8

Assessed by communicating information with clarity in the forms indicated in Criterion A and listing sources according to the instructions from the task hand-outs.

#### Criterion D: Thinking Critically – Maximum 8

Assessed through information given in written pieces of work (see Criterion A ), the identification of bias of sources, the use of information to form and give opinions and the identification and analysis of sources/data in terms of origin, purpose and usefulness.

# MATHEMATICS

## Mathematics

Mathematics is taught in accordance with the IB mathematics program guide. This guide is not a syllabus but merely an overview of the topics suggested by the IB. MYP mathematics is largely based on inquiry where the approach to the subject is through practical work and exploration. The International Maths book 1 and 2 is used as a resource in the classroom.

The content of mathematics in the MYP focuses on building knowledge and understanding of the following concepts:

- Number order and structure (positive and negative directed numbers)
- Fractions and Decimals
- Algebra
- Geometry (Angles and Shapes)
- Graphs, Statistics & Probability

### Assessment

Mathematics will be assessed according to four criteria.

#### **Criterion A: Knowing and Understanding** – Maximum 8

This objective requires students to demonstrate knowledge and understanding of the concepts and skills of the branches in the prescribed framework. This assessment criteria is often summated in the form of chapter tests and quizzes.

#### **Criterion B: Investigating Patterns** – Maximum 8

Investigating patterns allows students to experience the excitement and satisfaction of mathematical discovery. Students should be able to select and apply mathematical problem-solving techniques to discover simple as well as complex patterns and prove, verify and justify general rules. This assessment criterion is often conducted independently and in groups through oral presentations and written assignments.

#### **Criterion C: Communicating** – Maximum 8

Mathematics provides a powerful and universal language. Students are expected to use appropriate mathematical language and different forms of representation when communicating mathematical ideas both orally and in writing. This assessment criterion is summated through oral communication in presentations and through written assignments and tests.

#### **Criterion D: Applying Mathematics in Real-life Contexts** - Maximum 8

Mathematics encourages students to see mathematics as a tool for solving problems in an authentic real-life context. Students are expected to transfer theoretical mathematical knowledge into real-world situations and apply appropriate problem-solving strategies, draw valid conclusions and reflect upon their results. This assessment criterion is often conducted independently and in groups through oral presentations and written assignments.

*Criterion A along with criterion C are usually assessed using tests and quizzes where knowledge of the topic is assessed. Inquiry-based assignments such as investigation exercises are usually but not always assessed on the basis of criteria B, C and D. A minimum of two assessments per criterion along with classwork and homework in general constitute the basis for the final grade at the end of the year.*

## SCIENCES

### Integrated Science

*“Dans les champs de l'observation le hasard ne favorise que les esprits prepares”.*

*- In the fields of observation chance favours only the prepared mind.”. - Louis Pasteur (7 December 1854)*

During the year the following topics will be taught:

- Identification of Lab equipment and safety guidelines
- Introduction to Chemistry: Chemical reactions, Acids and bases, Solids, fluids and gases
- Scientific method and Science history
- Astronomy
- Non/Renewable energy
- Cells

#### Assessment

The assessment for sciences courses in all years of the programme is criterion-related, based on four equally weighted assessment criteria:

#### Criterion A: Knowing and Understanding – Maximum 8

Students develop scientific knowledge (facts, ideas, concepts, processes, laws, principles, models and theories) and apply it to solve problems and express scientifically supported judgments. This assessment criterion is often summated in the form of chapter tests.

#### Criterion B: Inquiring and designing - Maximum 8

Intellectual and practical skills are developed through designing, analysing and performing scientific investigations. Although the scientific method involves a wide variety of approaches, the MYP emphasizes experimental work and scientific inquiry.

When students design a scientific investigation they should develop a method that will allow them to collect sufficient data so that the problem or question can be answered. This assessment criterion is often conducted independently and in groups through oral presentations and written assignments.

#### Criterion C: Processing and evaluating - Maximum 8

Students collect, process and interpret qualitative and/or quantitative data, and explain conclusions that have been appropriately reached. MYP sciences helps students to develop analytical thinking skills, which they can use to evaluate the method and discuss possible improvements or extensions. This assessment criterion is often conducted independently and in groups through oral presentations and written assignments.

#### Criterion D: Reflecting on the impacts of science - Maximum 8

Students gain global understanding of science by evaluating the implications of scientific developments and their applications to a specific problem or issue. A variety of communication modes will be applied in order to demonstrate understanding. Students are expected to become aware of the importance of documenting the work of others when communicating in science. This assessment criterion is often conducted independently and in groups through oral presentations and written assignments.

## DESIGN

### Design

The MYP Design course aims to challenge students to apply practical and creative thinking skills in a variety of design situations. Inquiry and problem solving are at the heart of the subject group, and the students are required to use the design cycle. The final solutions they create can range from a model, or prototype, to a product or system as long as it is one that they have developed and created independently. All students are expected to be actively involved in the whole design process, rather than just the final solution. Each year students complete two units of work.

During the 2017 – 2018 school year the students will be taught the following units:

- Information: E-book - *Internally publish a prototype E-book about animals for young children using the iPads.*
- Product: “Clock” - *After researching the history of time-keeping devices, create an analog clock or other time-keeping device that you and others would find useful on a day-to-day basis.*

### Assessment

The design cycle is used in each unit of work and this is assessed using four assessment criteria.

#### Criterion A: Inquiring and Analyzing – Maximum 8

Covers the student’s justification for the need to find a solution for the problem they are studying, their research, analysis of existing solutions or products and the production of a design brief.

#### Criterion B: Developing Ideas – Maximum 8

Students are expected not only to develop a range of different ideas, but also to create a specification, or set of criteria to establish whether or not their design was successful. This criterion also measures the planning that was put into producing and finalizing their solution.

#### Criterion C: Creating the Solution – Maximum 8

In this criterion the ability to construct a logical plan, as well as the students’ technical skills are assessed. Students can change their plan as they create but these changes must be fully justified.

#### Criterion D: Evaluating – Maximum 8

Measures the student’s ability to critically reflect on the success of their solution, which they are expected to test, explain any improvements that could be made and explain the impact of their solution on their target audience.

# Design assessment criteria: Year 1

## Criterion A: Inquiring and analysing

### Maximum: 8

At the end of year 1, students should be able to:

- i. explain and justify the need for a solution to a problem
- ii. state and prioritize the main points of research needed to develop a solution to the problem
- iii. describe the main features of one existing product that inspires a solution to the problem

## ARTS

### Visual Arts

During this school year students will complete three units of work in visual arts.

These units are;

- Medieval Mysteries
- Stop motion (Transdisciplinary unit with English Language and Literature)
- Mosaics

Each unit of work requires students to sketch and plan in their arts process journals (some planning can also be electronic, but must be submitted for assessment in a readable format), produce a final piece of art work, complete a written piece of work (often research based) and record ongoing reflections. In MYP Arts the process used to create art work, and the ability to demonstrate creative thinking, are as important as the final artwork itself.

#### Assessment

The visual arts are assessed using four criteria – Knowledge and Understanding, Developing skills, Thinking creatively and Responding. For each unit of work there are task-specific clarifications (rubrics) explaining what students need to do in order to achieve a certain level. It is important that students read each rubric carefully so that they understand what they are being assessed on. The rubrics will be put onto It's learning along with the learning objectives for each unit.

#### Criterion A: Knowledge and Understanding – Maximum 8

Usually assessed through written pieces of work, either in the arts process journals or through specific assignments. However it can also be assessed through oral presentations, or discussions with students.

#### Criterion B: Art-specific skills – Maximum 8

Assessed using, and covers the acquisition and development of, skills, evidence of which can be found in arts process journals, as well as in the final piece of artwork.

#### Criterion C: Thinking creatively – Maximum 8

Measured through planning and reflections in arts process journals, as well as the processes students use to create art.

#### Criterion D: Responding – Maximum 8

Measures ability to transfer their learning into new settings and to create an artistic response to the world around them. It is measured through their final art work, and written critiques of their own work and the work of others.

## ARTS

### Performing Arts

During Grade 6, students will complete at two Units of work in Performing Arts. These Units will include the following:

#### Grade 6

- Modern Dance
- A Midsummer Night's Dream

Two main Units of study will include an in-depth unit on contemporary dance with a particular focus on the Martha Graham school of dance. Students will explore all aspects of the assessment criteria through student-developed choreography and performance. The second unit will be in interdisciplinary study of *A Midsummer Night's Dream* with English Language and Literature, as well as Visual Arts. In this unit students will develop a rich set of skills to perform both on stage, and using stop-motion animation technology.

#### Assessment

Performing Arts is assessed using the four criteria as outlined by the IB. The process involved in the creation of pieces is as important as the final product and this process will be assessed. Assessment tasks will often be practical performance work, but written tasks will also form part of the assessment. The criteria are:

##### **Criterion A: Knowledge and Understanding** - Maximum 8

Students should be able to demonstrate awareness of the art form studied, including the use of appropriate language. They should be able to demonstrate awareness of the relationship between the art form and its context as well as the links between the knowledge acquired and artwork created.

##### **Criterion B: Developing Skills** - Maximum 8

Students should be able to demonstrate the acquisition and development of the skills and techniques of the art form studied and the application of skills and techniques to create, perform and/or present art.

##### **Criterion C: Thinking Creatively** - Maximum 8

Students should be able to identify an artistic intention in addition to alternatives and perspectives. They should also demonstrate the exploration of ideas

##### **Criterion D: Responding** - Maximum 8

Students should be able to identify connections between art forms, art and context, or art and prior learning. They should be able to recognize that the world contains inspiration or influence for art and evaluate certain elements or principles of artwork.

## PHYSICAL AND HEALTH EDUCATION

### Physical and Health Education

*“Physical Fitness is not only one of the most important keys to a healthy body, it is the basis of dynamic and creative intellectual activity”. J.F. Kennedy*

It is important that students come to class on time and prepared with proper indoor/outdoor footwear as well as athletic clothing such as t-shirt, shorts, track pants, yoga/exercise pants. Boots and jeans are not appropriate.

During the year the following physical and health education topics will be taught:

- Introduction to Health education and Fitness
- Badminton
- Football (Soccer)
- Introduction to Basketball
- Introduction to Orienteering
- Cross Country running and Relay
- Handball
- Introduction to Ultimate Frisbee
- Introduction to Bandy/Floor Hockey
- Introduction to Baseball

#### **Assessment**

The assessment for PHE in the MYP is criterion-related, based on four equally weighted assessment criteria.

#### **Criterion A: Knowing and understanding** - Maximum 8

Throughout year 1, students should be able to outline physical health education related factual, procedural and conceptual knowledge, identify physical and health education knowledge to describe issues and solve problems set in familiar and unfamiliar situations, and apply physical sport and health terminology to communicate understanding. Written assignments are often used in Criteria A. Assessment of this objective should be completed using oral presentations or written assignments.

#### **Criterion B: Planning for Performance** - Maximum 8

During year 1, students should be able to construct and outline a plan for improving health or physical activity as well as describe the effectiveness of their plan based on the outcome. This criterion will be assessed within units that require students to inquire and plan.

#### **Criterion C: Applying and Performing** - Maximum 8

At the end of year 1, students should be able to recall and apply a range of skills and techniques they have practiced, effectively recall and apply a range of strategies and movement concepts as well as recall and apply information to allow them to perform effectively.

Criterion C is assessed in performance/playing situations and could include developing skills such as accuracy, timing, coordination, efficiency, control, speed and the use of personal space and flow.

#### **Criterion D: Reflecting and improving performance** - Maximum 8

At the end of year 1 of the MYP, students should be able to identify and demonstrate strategies to enhance interpersonal skills, identify goals and apply strategies to enhance performance, describe and summarize their performance.

Criterion D is appropriate for assessing personal and social development in sports/ performance leadership.

### Notes for criterion B

- Criterion B can be assessed through units that require students to inquire and plan. Examples include: composition of aesthetic movement routines (such as gymnastics, dance, sport aerobics, martial arts), fitness training programmes, coaching programmes, game creation and laboratory investigations (such as fitness, skill acquisition, energy systems).
- Planning for the execution of skills is not appropriate for assessment against this criterion. (For example, criterion B is not used to assess a student's plan of how to execute a skill such as tackling in rugby or performing a lay-up in basketball.)
- In order to meet the requirements of criterion B, students must carry out their plan to evaluate it.

## INTERDISCIPLINARY UNITS

### Interdisciplinary Teaching and Learning

One of the key features of the MYP is its focus on interdisciplinary teaching and learning. This is beneficial to students as it allows them to use knowledge to foster new understandings, develops flexible thinking, develops collaboration and teamwork and gives them a holistic approach to studying real- life issues and ideas.

Students demonstrate interdisciplinary learning when they bring together concepts or knowledge from several subjects (disciplines) to show new understandings or solutions that would have not been possible through the study of a single subject.

From this school year each year group will complete one interdisciplinary project each year. As we are still in the developmental phase of creating these units, then in some years, students may experience more than one interdisciplinary unit of work in a school year.

*The units of work planned for 2017 - 2018 are:*

<b>Grade</b>	<b>Unit and summary</b>	<b>Subjects</b>	<b>Global context</b>
6	Astronomy - creating a new society after a meteor	Science, Math, PE. PA, Integrated Humanities	Scientific and Technical innovation
8	Tourism – report writing about the effects of tourism in Bergen	Integrated Humanities, English, Math	Globalization and sustainability
