This is an on-going evaluation and the decision is made by the subject teachers. These students are still considered as Language Acquisition students and will be assessed using Language Acquisition criteria.

A transition from Norwegian Language Acquisition to Language and Literature happens after an evaluation by the subject teacher and in dialogue with the student and parents.

## Assessment

Mathematics will be assessed according to four criteria.

### Criterion A: Knowing and Understanding – Maximum 8

This objective requires students to demonstrate knowledge and understanding of the concepts and skills of the four branches in the prescribed framework (number, algebra, geometry and trigonometry, statistics and probability. This assessment criterion is often summated in the form of chapter tests.

### Criterion B: Investigating Patterns – Maximum 8

Investigating patterns allows students to experience the excitement and satisfaction of mathematical discovery. Students should be able to select and apply mathematical problem-solving techniques to discover complex patterns, describe patterns and prove, verify and justify general rules. This assessment criterion is often conducted independently and in groups through oral presentations and written assignments.

### Criterion C: Communicating – Maximum 8

Mathematics provides a powerful and universal language. Students are expected to use appropriate mathematical language and different forms of representation when communicating mathematical ideas both orally and in writing. This assessment criterion is summated through oral communication in presentations and through written assignments and tests.

### Criterion D: Applying Mathematics in Real-life Contexts - Maximum 8

Mathematics encourages students to see mathematics as a tool for solving problems in an authentic real-life context. Students are expected to transfer theoretical mathematical knowledge into real-world situations and apply appropriate problem-solving strategies, draw valid conclusions and reflect upon their results. This assessment criterion is often conducted independently and in groups through oral presentations and written assignments.

## SCIENCES

### Integrated Science

“The scientific mind does not so much provide the right answers as asks the right questions”. - Claude Levi-Strauss

During the year the following topics will be taught:

#### Grade 7

- Forces make the world go round
- Atoms, elements, compounds and mixtures
- Environment
- Acids and alkalis
- Rocks and Plate tectonics
- Plant Biology

#### Grade 8

- Periodic Table and Atomic structure – Properties of the Elements, Particle Theory
- Human Biology I - Anatomy
- Human Biology II - Genetics
- Forces and Motion
- Electricity and magnetism

### Assessment

The assessment for sciences courses in all years of the programme is criterion-related, based on four equally weighted assessment criteria:

#### Criterion A: Knowing and Understanding – Maximum 8

Students develop scientific knowledge (facts, ideas, concepts, processes, laws, principles, models and theories) and apply it to solve problems and express scientifically supported judgments.

- *Assessment tasks:* This objective must be assessed using tests or exams.

#### Criterion B: Inquiring and designing - Maximum 8

Intellectual and practical skills are developed through designing, analysing and performing scientific investigations. Although the scientific method involves a wide variety of approaches, the MYP emphasizes experimental work and scientific inquiry. When students design a scientific investigation they should develop a method that will allow them to collect sufficient data so that the problem or question can be answered. Using their background knowledge to develop a reason based hypothesis, set the variables for their investigation and also ascertain the units of measurement for their data.

- *Assessment task:* Lab report with a clear aim of their investigation, a hypothesis and tables and other organisers to collect the data, and skills to put together a safe and effective laboratory technique to carry out the experiment. These form the strands of assessment B

#### Criterion C: Processing and evaluating - Maximum 8

Students collect, process and interpret qualitative and/or quantitative data, and explain conclusions that have been appropriately reached. MYP sciences helps students to develop analytical thinking skills, which they can use to evaluate the method and discuss possible improvements or extensions. Students are expected to use various graphing techniques to interpret their data and draw scientific conclusions from them.

- *Assessment task:* Lab report (most of the time this is a continuation of the lab report under criterion B) with data processing, conclusion and reflection.

**Criterion D: Reflecting on the impacts of science - Maximum 8**

Students gain global understanding of science by evaluating the implications of scientific developments and their applications to a specific problem or issue. A variety of communication modes will be applied in order to demonstrate effective communication techniques in the Sciences. Students are expected to become aware of the importance of documenting the work of others when communicating in science.

- *Assessment Task:* The tasks used to assess this criterion will be essays on prescribed topics, or presentations made by students individually or in groups using varied media like power point, videos or posters.

## DESIGN

### Design

The MYP Design course aims to challenge students to apply practical and creative thinking skills in a variety of design situations. Inquiry and problem solving are at the heart of the subject group, and the students are required to use the design cycle. The final solutions they create can range from a model, or prototype, to a product or system as long as it is one that they have developed and created independently. All students are expected to be actively involved in the whole design process, rather than just the final solution. Each year students complete two units of work.

#### Grade 7

- Product - Educational Toy: *Students will design and create a simple but educational toy that children age 3 to 4 years old would enjoy.*
- Information - Waste Management Campaign: *The students will design a name, slogan and poster for a recycling/waste management campaign and then use these to create a Wikispace page and an A3 size informational poster.*

#### Grade 8

- Product Food Packaging: *Design and create a prototype food packaging for a new sandwich by the company 'Lunch to Go'. Environmental factors as well as aesthetics must be considered in its design.*
- Information School of the Future: *Design a school to be built by 2024 and create a presentation to potential students and their parents about choosing the new school you have designed.*

#### Assessment

The design cycle is used in each unit of work and this is assessed using four assessment criteria.

##### **Criterion A: Inquiring and Analyzing** – Maximum 8

Covers the student's justification for the need to find a solution for the problem they are studying, their research, analysis of existing solutions or products and the production of a design brief.

##### **Criterion B: Developing Ideas** – Maximum 8

Students are expected not only to develop a range of different ideas, but also to create a specification, or set of criteria to establish whether or not their design was successful. This criterion also measures the planning that was put into producing and finalizing their solution.

##### **Criterion C: Creating the Solution** – Maximum 8

In this criterion, the ability to construct a logical plan, as well as the students' technical skills are assessed. Students can change their plan as they create but these changes must be fully justified.

##### **Criterion D: Evaluating** – Maximum 8

Measures the student's ability to critically reflect on the success of their solution, which they are expected to test, explain any improvements that could be made and explain the impact of their solution on their target audience.

## ARTS

### Visual Arts

During this school year students will complete three units of work in visual arts.

These units are;

#### Grade 7

- Robotic Art
- Breaking News
- Landscape Printing
- Symbols and conventions

#### Grade 8

- Surrealism: *drawing and sculpture*
- Hand and Gestures: *sculpture*
- Propaganda posters: *mixed media*

Each unit of work requires students to sketch and plan in their arts process journals (some planning can also be electronic, but must be submitted for assessment in a readable format), produce a final piece of art work, complete a written piece of work (often research based) and record ongoing reflections. In MYP Arts the process used to create art work, and the ability to demonstrate creative thinking, are as important as the final artwork itself.

#### Assessment

The visual arts are assessed using four criteria – Knowledge and Understanding, Developing skills, Thinking creatively and Responding. For each unit of work there are task-specific clarifications (rubrics) explaining what students need to do in order to achieve a certain level. It is important that students read each rubric carefully so that they understand what they are being assessed on. The rubrics will be put onto It's learning along with the learning objectives for each unit.

#### Criterion A: Knowledge and Understanding – Maximum 8

Usually assessed through written pieces of work, either in the arts process journals or through specific assignments. However, it can also be assessed through oral presentations, or discussions with students.

#### Criterion B: Art-specific skills – Maximum 8

Assessed using, and covers the acquisition and development of, skills, evidence of which can be found in arts process journals, as well as in the final piece of artwork.

#### Criterion C: Thinking creatively – Maximum 8

Measured through planning and reflections in arts process journals, as well as the processes students use to create art.

#### Criterion D: Responding – Maximum 8

Measures ability to transfer their learning into new settings and to create an artistic response to the world around them. It is measured through their final art work, and written critiques of their own work and the work of others.

## ARTS

### Performing Arts

During Grade 7 and 8, students will complete three Units of work in Performing Arts. These Units will include the following:

#### Grade 7

- The Terrible Fate of Humpty Dumpty by David Calcutt (play)
- A New Beginning
- Stabbing at a Disco

More details on the Units are available on Its Learning. The three Units follow a format that are typical through grades 6 – 8. Using improvisation and devising as the key tools we will look at a narrative that explores a range of issues through the mediums of Performing Arts to gain a deeper understanding of these issues.

At the same time, an appreciation of the art forms will be developed and a range of specific skills related to the art forms will be explored and mastered in each Unit. For example, in A New Beginning we look at how the human race might survive an ELI (extinction level event) amongst other things and explore the Performing Arts skills of play building and slow motion amongst other things. Generally, we are aiming to make our work believable and sustained.

#### Grade 8

- Junk
- Frankenstein
- Dance Off
- Thriller genre/Soundtrack music

More details on the Units are available on Its Learning. The four Units follow a format that are typical through Grades 6 – 8. Using improvisation and devising as the key tools we will look at a narrative that explores a range of issues through the mediums of Performing Arts to gain a deeper understanding of these issues.

At the same time, an appreciation of the art forms will be developed and a range of specific skills related to the art forms will be explored and mastered in each Unit. For example, in The Identification we look at peer pressure and consequences amongst other things and explore the Performing Arts skills of dance and its origins in the Dance Off Unit, amongst other things. Generally, we are aiming to make our work believable and sustained especially in serious dramatic circumstances. The issues covered in Grade 8 are quite adult and involve areas that start to influence young people in this age group.

#### Assessment

Performing Arts is assessed using the four criteria as outlined by the IB. The process involved in the creation of pieces is as important as the final product and this process will be assessed. Assessment tasks will often be practical performance work but written tasks will also form part of the assessment.

#### Criterion A: Knowledge and Understanding - Maximum 8

Knowing and understanding Maximum: 8, students should be able to: i. demonstrate knowledge of the art form studied, including concepts, processes, and the use of appropriate language ii. demonstrate knowledge of the role of the art form in original or displaced contexts iii. use acquired knowledge to inform their artwork.

#### Criterion B: Developing Skills - Maximum 8

Developing skills Maximum: 8, students should be able to: i. demonstrate the acquisition and development of the skills and techniques of the art form studied ii. demonstrate the application of skills and techniques to create, perform and/or present art.

**Criterion C: Thinking Creatively** - Maximum 8

Students should be able to outline a clear and feasible artistic intention as well as alternatives, perspectives, and imaginative solutions. They should also be able demonstrate the exploration of ideas through the developmental process to a point of realization.

**Criterion D: Responding** - Maximum 8

Students should be able to outline connections and transfer learning to new settings in addition to create an artistic response inspired by the world around them and evaluate the artwork of self and others.

## PHYSICAL AND HEALTH EDUCATION

### Physical and Health Education

*“Physical Fitness is not only the one of the most important keys to a healthy body, it is the basis of dynamic and creative intellectual activity.” - J.F. Kennedy*

It is important that students come to class on time and prepared with proper indoor/outdoor footwear as well as athletic clothing such as t-shirt, shorts, track pants, yoga/exercise pants. Boots and jeans are not appropriate.

During the school year the following physical education topics will be taught to students:

- Health education and Fitness training
- Badminton
- Introduction to Baseball
- Basketball
- Orienteering
- Cross country running and Relay
- Handball
- Ultimate Frisbee
- Bandy/Floor Hockey
- Football

#### **Assessment**

The assessment for PHE in the MYP is criterion-related, based on four equally weighted assessment criteria.

#### **Criterion A: Knowing and understanding** - Maximum 8

Throughout year 2 and 3, students should be able to outline physical health education related factual, procedural and conceptual knowledge, identify physical and health education knowledge to describe issues and solve problems set in familiar and unfamiliar situations and apply physical sport and health terminology to communicate understanding. Written assignments are often used in Criteria A.

Assessment of this objective should be done using oral presentations or written assignments.

#### **Criterion B: Planning for Performance** - Maximum 8

During year 2/3, students should be able to construct and outline a plan for improving health or physical activity as well as describe and reflect on the effectiveness of their plan based on the outcome. This criterion will be assessed within units that require students to inquire and plan.

#### **Criterion C: Applying and Performing** - Maximum 8

At the end of year 2/3, students should be able to recall, apply and demonstrate a range of skills and techniques they have practiced, effectively recall and apply a range of strategies and movement concepts as well as recall and apply information to allow them to perform effectively.

Criterion C is assessed in performance/playing situations and could include developing skills such as accuracy, timing, coordination, efficiency, control, speed and the use of personal space and flow.

#### **Criterion D: Reflecting and improving performance** - Maximum 8

At the end of year 2 and 3, students should be able to identify and demonstrate strategies to enhance interpersonal skills, identify goals and apply strategies to enhance performance, describe and summarize their performance.

Criterion D is appropriate for assessing personal and social development in sports/ performance leadership.

### Notes for criterion B

- Criterion B can be assessed through units that require students to inquire and plan. Examples include: composition of aesthetic movement routines (such as gymnastics, dance, sport aerobics, martial arts), fitness training programmes, coaching programmes, game creation and laboratory investigations (such as fitness, skill acquisition, energy systems).
- Planning for the execution of skills is not appropriate for assessment against this criterion. (For example, criterion B is not used to assess a student's plan of how to execute a skill such as tackling in rugby or performing a lay-up in basketball.)
- In order to meet the requirements of criterion B, students must carry out their plan to evaluate it.

## Criterion C: Applying and performing

## INTERDISCIPLINARY UNITS

### Interdisciplinary Teaching and Learning

One of the key features of the MYP is its focus on interdisciplinary teaching and learning. This is beneficial to students as it allows them to use knowledge to foster new understandings, develops flexible thinking, develops collaboration and teamwork and gives them a holistic approach to studying real- life issues and ideas.

Students demonstrate interdisciplinary learning when they bring together concepts or knowledge from several subjects (disciplines) to show new understandings or solutions that would have not been possible through the study of a single subject.

From this school year each year group will complete one interdisciplinary project each year. As we are still in the developmental phase of creating these units, then in some years, students may experience more than one interdisciplinary unit of work in a school year.

*The units of work planned for 2017- 2018 are:*

<b>Grade</b>	<b>Unit and summary</b>	<b>Subjects</b>	<b>Global context</b>
6	Astronomy - creating a new society after a meteor	Science, Math, PE. PA, Integrated Humanities	Scientific and Technical innovation
8	Tourism – report writing about the effects of tourism in Bergen	Integrated Humanities, English, Math	Globalization and sustainability
9	Form and Time – A conceptual unit that develops student understanding of how things are shaped by the times that they are created in.	Science, French, Language and Literature, English Language and Literature	Personal and cultural expression
	Sustainability – a unit on waste and recycled materials, encouraging students to create and present fashion items made from recycled materials.	Visual Art, Performing Art, Design	Globalization and sustainability

The final pieces of work produced by students for these units will be assessed using specific interdisciplinary assessment criteria and these are: *criterion A - Disciplinary grounding, criterion B - Synthesizing, criterion C - Communicating, criterion D - Reflecting.*

These assessment criteria are differentiated for grade 6, grades 7 and 8, and grades 9 and 10, and the achievement levels for these will most likely be recorded on the June report cards.
